Subject: Request to access documents pertaining to wastewater testing project
Date: January 31, 2022 at 12:09 PM
To: Access to Documents (Secretariat) accesstodocuments.secretariat@mcgill.ca

Good afternoon,

Pursuant to s. 9 of the *Act respecting access to documents held by public bodies and the protection of personal information*, the *McGill Daily* submits the request for access to the following documents pertaining to the wastewater testing project at McGill University:

1. Any report, document, or correspondence shared between Dominic Frigon, Stephanie Loeb, and McGill University in respect of undertaking to report data regarding wastewater collection at all 7 collection sites between October 2021 and January 2022, including but not limited to daily, weekly and other reporting of:
 - a. the methodology used in conducting the study;
 - b. the raw data per site with all accompanying definitions;
 - c. the number of positive results detected at collection sites
 - d. location of positive results;
 - e. evaluation of the severity of those results;
 - f. any comparative data from other sites, in particular, from other university residences; and
 - g. recommendations in respect of those results
2. Any meeting minutes, opinions, briefs, documents or emails shared between Dominic Frigon, Stephanie Loeb, and McGill University explaining what amount of positive result detected in wastewater defines “vigilance level,” “precursor level,” and “outbreak level.”
3. Any e-mails, memos, and other documentation – physical or electronic – from or to Fabrice Labeau and/or his office, the Emergency Operations Centre or its predecessors in relation to wastewater collection, analysis, reporting and communications at or in respect of McGill University.

Thank you for your assistance.

Sincerely,

Saylor and Abigail
